

Dear Parents,

Following June's inspection the school was required to make a number of improvements to its systems and ability to evidence that it is compliant with all of the standards set out by the Independent Schools' Inspectorate.

Mr Mulryne, the Board of Governors and the senior management team acted quickly to produce an action plan to ensure that this happened and that the systems in place were not only watertight but consistently adhered to.

The school had a follow up inspection last week to check on the progress that was being made towards meeting the action points from June's report. I am delighted to say that all areas highlighted in June as requiring improvement have been addressed and the inspection team left happy that we are now compliant in all areas. A copy of the progress monitoring visit report is attached with this email and is also available of the school website for you to read.

I know that Mr Mulryne will be happy to discuss any of the issues surrounding our recent inspections with you should you wish to discuss them with him further.

Yours sincerely,

Rodger Hobson.
